Description:

Fifth Edition Sheds New Light on Open Source Intelligence Collection and Analysis. Author Michael Bazzell has been well known and respected in government circles for his ability to locate personal information about any target through Open Source Intelligence (OSINT). In this book, he shares his methods in great detail. Each step of his process is explained throughout sixteen chapters of specialized websites, application programming interfaces, and software solutions. Based on his live and

online video training at IntelTechniques.com, over 250 resources are identified with narrative tutorials and screen captures.

This book will serve as a reference guide for anyone that is responsible for the collection of online content. It is written in a hands-on style that encourages the reader to execute the tutorials as they go. The search techniques offered will inspire analysts to "think outside the box" when scouring the internet for personal information.

Much of the content of this book has never been discussed in any publication. Always thinking like a hacker, the author has identified new ways to use various technologies for an unintended purpose. This book will improve anyone's online investigative skills. Among other techniques, you will learn how to locate:

Hidden Social Network Content
Cell Phone Subscriber Information
Deleted Websites & Posts
Missing Facebook Profile Data
Full Twitter Account Data
Alias Social Network Profiles
Free Investigative Software
Useful Browser Extensions
Alternative Search Engine Results
Website Owner Information
Photo GPS & Metadata
Live Streaming
Social Content
Social Content by Location
IP Addresses of Users
Additional User Accounts
Sensitive Documents & Photos
Private Email Addresses
Duplicate Video Posts
Mobile App Network Data
Unlisted Addresses & #s
Public Government Records
Document Metadata
Rental Vehicle Contracts
Online Criminal Activity
