**Description:**

For use as a text in foundations generalist social policy courses, either at the baccalaureate or master's level, this book examines the process of defining need, analyzing social policy, and

developing new policy. A clear philosophical base and a common theoretical framework underlie the discussion of each component of the policy process. Four themes are interwoven throughout the book: the importance of thinking critically about social policy, the benefits of using the strengths perspective in policy analysis and development, the critical role social policy plays in all areas of practice, and the absolute responsibility of every social worker to engage in policy practice.

Routledgesw.com now contains 6 cases; the Sanchez Case has been revised to include much more policy content. Instructor materials include extra readings, PowerPoints, test questions, annotated links, syllabi, and EPAS guidelines. The book is also customizable on Routledge Custom Gateway.
